PROFESSIONAL SUMMARY

A results-driven **Fullstack Software Engineer** with 6 years of proven excellence in delivering high-impact solutions. Recognized as a top performer who consistently translates complex technical challenges into measurable business outcomes. Known for fostering collaborative environments and committed to pushing boundaries.

EXPERIENCE

- **Software Engineer IV** Apr. 2021 - Present
iFIT - Interactive at Home Fitness *Remote*
 - **Project Leadership:** Led and implemented a goals service supporting 100,000+ concurrent users, resulting in a 25% reduction in user churn rate. Youngest employee to lead a major project from inception to completion.
 - **Distributed Systems:** Architected and developed an event-driven microservice architecture using NestJS, AWS Kinesis, containers, and MongoDB, supporting 1 million monthly active users.
 - **Business Impact Focus:** Championed a shift from feature-quantity focus to measurable user and business impact across the organization, leveraging data analytics to drive product decisions.
 - **Mentorship and Leadership:** Provided guidance to junior employees on architectural and development decisions, promoting a balance of pragmatism and extendability.
 - **Incident Management:** Coordinated team responses to system outages, resulting in timely resolutions and minimal user impact. Presented blameless postmortems and improved service observability to accelerate incident response times.
- **Media Software Engineer** Jul. 2020 - Apr. 2021
Disney - Media & Entertainment Distribution *Remote*
 - **Media Hub:** Maintained and contributed to an Emmy award winning web app used daily by over a 1,000 Disney employees. The app provides an e2e solution for managing media assets.
 - **Service Deprecation:** Saved \$120,000+ annually by leading the replacement of a monolithic service to a serverless event driven architecture.
- **Co-founder & CTO** Feb. 2019 - Jul. 2020
Sphere Influencer - Social Media Marketing *Los Angeles, CA*
 - **Mona SaaS:** Generated +\$1,500 in MRR by developing a full-stack web app for influencer marketing campaigns. Utilized React, AWS serverless technologies, and Elasticsearch.

PERSONAL PROJECTS

- **MAKID:** Develop and maintain a desktop music management application using Electron.js, having grown it from zero to 1,000+ Monthly Active Users. Leverage Mixpanel analytics to drive data-informed business decisions and guide feature development.
- **Technical Blog:** Contribute to my blog, EricVentor.com, where I write about personal projects, learnings, and general tech.

TECHNICAL EXPERTISE

- **Languages:** Typescript, Python, SQL
 - **Backend:** Node.js, NestJS, REST, GraphQL, Containers, Serverless
 - **Frontend:** React, Next.js, Electron, Vite, Tailwind CSS
 - **Databases:** PostgreSQL, MongoDB, Snowflake,
- EDUCATION

Vector Stores, DynamoDB, Elasticsearch

- **Tools:** LLMs (ChatGPT & Claude), Mixpanel, LangChain, Docker, Datadog, Git, Jest, Terraform,
- **AWS Services:** RDS, S3, IAM, ECS, EC2, Fargate, Lambda, Kinesis, CloudFront, SNS, SQS, API Gateway

-
- **University of California, Santa Cruz**
Bachelors of Science in Computer Science

Santa Cruz, CA
Sept. 2015 - Jun. 2019
